Foul Drain overview
Southern Water - presentation to the MPP Swish group is attached.

Rainwater overview
The first stage of works to the pond has been completed . The weir is now lowered and as the marsh area dries out we are obtaining quotes for the full dredging and removal of the island.

We are not getting sufficient local volunteer support for Flow Fridays to be able continue much longer.
The Parish cannot expect outside volunteers to be doing all of the work.
There are other projects around the village that would keep twenty volunteers busy the last Friday of every month throughout the year in order to maintain the verges and ditches….

The Rife and sea wall
After further studies, WSCC and the Environment Agency will be presenting to the public in the Memorial Hall at 6.00pm on 27th October.

Funding
Further applications around the village are now in progress as revised quotes come in.
